

Compo-SiL[®] FR Series

Laminable Flame Retardant Silicone Sheet

Anti-Slip & Flame Retardant

Compo-SiL[®] FR Series are kinds of laminable flame retardant silicone sheet, which can be roll to roll bonded with different flame resistant fabric through PUR adhesives. It fulfills the requirement of UL 94-V0 flammability standard. **Compo-SiL[®] FR Series** show excellent properties including flame retardance, anti-slip, anti-fouling, high temperature resistance, non-melting & non-dripping, anti-aging, chemical resistance, electrical insulation, UV, ozone and weathering resistance etc. **Compo-SiL[®] FR Series** are one of the best choices for safety protection materials through innovative patented technology combined with silicone and PU interface. As a surface material for fire or electric welding protective wear equipment, such as gloves, clothing and shoes, **Compo-SiL[®] FR Series** are particularly capable of exhibiting the excellent properties of silicone materials.
