

Compo-SiL[®] FN Series

Laminable Functional Deco-Strip

Athletic & Brilliant

Compo-SiL[®] FN Series has excellent resilience. After designed and die-cut to required shape, It can be heat-pressed on tights/compress garments, to provide the same feature as athletic taping, which can help to improve athletics' performance and preventing injuries. Silicone is an excellent water-resistant material. It won't have sticky hand feeling, and won't degrade after frequent washing. *Compo-SiL[®] FN Series* can be designed to present a variety of vibrant colors, to enhance the recognition of the products.

Testing Item	Functional Deco-Strip
Elongation (%)	260
Tensile Strength (kg/cm ²)	30.0

*Test Method: ASTM D412

Low Fatigue

Laundry Resistant

High Elastic

Vibrant Colors
