

Anti-Slip Strip

Stretchy & Skin-Friendly

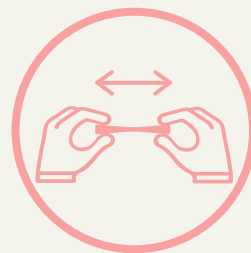

Compo-SiL[®] can be applied on the inner layer of underwear, tights or any intimate clothing as anti-slip strip. The unique skin-friendly properties of silicone can keep users away from allergies even after long-time wearing, which is ideal for sensitive skin. *Compo-SiL[®]* anti-slip strips also have excellent elasticity and resilience, which keeps the garments from deforming after long time stretching, and don't have burrs like textiles. In the meantime, *Compo-SiL[®]* anti-slip strip is very light and thin, especially suitable for seamless underwear.

Skin-Friendly

Seamless

High Elastic

Burr-free
