

Compo-SiL[®] FN Series

Laminable Functional Deco-Strip

Athletic & Brilliant

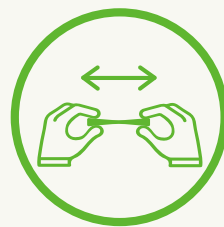

Compo-SiL[®] FN Series can be applied to all kinds of medical protective gears after designing for different body-support demands. The excellent resilience of silicone can stabilize the tendon and relieve pain of the protected part, and further achieve the cushioning effect. Through the excellent biocompatibility, skin-friendly and softness of silicone, it can maintain support and comfort after long time wearing. As a stable material, silicone will not degrade or become sticky after frequent wash. It can also provide freedom of design with various colors to decorate and enhance the product recognition.

Low Fatigue

Skin-Friendly
