

Gloves Material

Active & Efficient

Compo-SiL[®] provides excellent anti-slip and softness properties of silicone, making it an ideal material for sports or all kinds of functional gloves. Furthermore, **Compo-SiL[®]** is a digital printable silicone film, so it can present unique and detailed pattern design through printing to enhance product recognition. The direct heat-press method subverts the process of liquid silicone printing, which can effectively improve production efficiency.
