

Grating Effect Decoration

Dazzling & Enduring

Through embossing the surface and the unique patented technology, **Compo-SiL[®]** can exhibit the dazzling grating effect. After plying-up with HMA, it can become a decorative silicone film which can be directly heat-pressed on the clothing. The stable and heat-resistant silicone surface of **Compo-SiL[®]** maintains the grating effect after heat-pressed, ensuring that the overall design is fully presented. Using **Compo-SiL[®]** Grating Effect Decoration can not only makes the design more eye-catching, but also presents the excellent texture of silicone.
