

## Heat Transfer Decoration

Glamorous & Unlimited

*Compo-SiL<sup>®</sup>* is digital printable and can be plying-up with HMA through patented technology. Through roll-to-roll printing process, it can perfectly present extremely detailed design. And unlike screen print, there's no more size limit for the composition of your design. After printing and die-cut, it can be heat-pressed on apparel to become a glamorous decoration with excellent surface texture of silicone. The silicone surface will not degrade after frequent wash and sun-dried, can always enhance the good quality of the apparel.
